

PERFORMANCE OF KEY ECONOMIC, GOVERNANCE, ENVIRONMENTAL, AND SOCIAL INDICATORS 2023

ECONOMIC PERFORMANCE

Economic Performance	Unit	2020	2021	2022	2023
Business Overview					
Net Sales	Mil THB	132,402.44	141,047.69	155,586.35	136,152.71
Total Cost					
Operating cost	Mil THB	124,568.87	132,827.86	147,714.07	129,300.00
 Total Employee expenses + related benefits 	Mil THB	13,748.40	12,971.13	14,002.52	12,818.53
Cash paid for interest expenses	Mil THB	2,052.33	2,031.77 ⁽¹⁾	2,344.52	2,519.61
Dividend paid	Mil THB	2,538.82	3,946.89	4,399.38	3,891.13
Cash paid for corporate income tax	Mil THB	668.20	883.44	959.78	806.61
o Asia	Mil THB	205.34	372.40	488.54	397.66
 EU & Africa 	Mil THB	764.14	480.55	384.00	454.93
 North America 	Mil THB	-301.27	30.50	87.24	-45.97
R&D / Innovation					
 R&D spending as percentage of net sales 	%	0.24	0.21	0.18	0.09
Corporate Social Responsibility					
 CSR & community investment spending 	Mil THB	65.08	68.32	101.84	77.56
 Thai Union Group companies covered under SeaChange[®] & CSR program 	%	100	100	100	100

Remark:

- Tax paid: Positive amount (+) mean tax paid/ Negative amount (-) meant tax refund.
- ⁽¹⁾ Revised from 1,921.61mb to 2,031.77mb (increase +110.16mb from Deferred financing costs Long-term loans from Banks & Other financial institutions).
- The Bank of Thailand (BOT) has recently published a preliminary version of the Thailand Taxonomy Framework. This
 framework is still in the development phase and is currently undergoing a review process (<u>https://www.bot.or.th/en/financialinnovation/sustainable-finance/green/Thailand-Taxonomy.html</u>). While it is not yet finalized, the current draft primarily
 emphasizes the Transportation and Energy sectors. Consequently, Thai Union, a company operating in the food industry, is
 anticipating an updated version of the framework that includes the fishery sector, which is more relevant to their business. Thai
 Union is committed to adhering to the taxonomy requirements once the finalized version is released.

Remark:

- N/A = Not available
- No data = No data
- Not Applicable = those indicators are not relevance to the company's business.
- ⁽¹⁾ Data covers offices, factories, and farms in Thailand, Indonesia, Vietnam, France, Portugal, Poland, Germany, Norway, Ghana, Seychelles, Lithuania, Italy, Ireland, Netherlands, the United Kingdom, Russian Federation, and the United States of America. The occupational health and safety data excludes retail operations.
- ⁽²⁾ The number of employee covers employees working in the factory.
- ⁽³⁾ The data has been amended from SD report 2022.
- ⁽⁴⁾ The number of contractor covers contractors working in the factory, including contractors for maintenance work, temporary contractor, and permanent contractor. The number of contractor is counted from 1 person per day.
- ⁽⁵⁾ In 2023, there was fatality case regarding to contact with moving machine. The Company has established and driven the machine risk assessment and machine improvement programs and now closely working on a comprehensive health and safety prevention program.
- ⁽⁶⁾ In 2023, there were 3 permanent disability incidents occurred in Thailand (2 incidents) and Seychelles (1 incident), respectively. The company is closely working on a comprehensive health and safety prevention program.
- ⁽⁷⁾ Total recordable incident (TRIR) including medical treatment, restricted work case, lost day case, disability and fatality) ⁽⁸⁾ Total working hour covers employees and contractors.
- ⁽⁹⁾ Since 2020, there was no work-related ill health incident reported from Workmen's Compensation Fund.

-	Waste disposed by landfill and incineration	Tons	16,491	22,970	24,891	25,907
-	Waste disposed by landfill and incineration	kg/Ton FG	21	29	32	37
Food Loss ^{(4),(19)}	per production unit					
-	Total weight of food loss from operations (A)	Tons	118,087	124,059	139,651	125,970
	Total weight of food loss volumes used for alternative purposes (B)	Tons	116,458	122,835	138,659	125,015
	Total food loss discarded (A - B)	Tons	1,628	1,224	992	955
	Food loss intensity	Tons/Bath Billion	15.05	10.84	8.35	9.01
	data coverage	% Revenue	95.38	100	100	100
Packaging Materials						
2.3.3	Total weight of wood/paper fiber packaging	Tons	21,021.01	4,537.20	11,375.10	5476.3
	Recycled and/or certified wood/paper fiber	% of total weight	67.00	73.18	55.72	59.27
	Total weight of metal packaging	Tons	25,824.45	10,865.02	18,064.20	12638.40
	Recycled metal	% of total weight	67.00	48.31	48.45	38.29
	Total weight of glass packaging	Tons	736.41	76.68	773.1	145.3
	Recycled glass	% of total weight	67.00	75.00	0.81	0
Plastic Packaging		~				
2.3.4	Total weight of all plastic packaging	Tons	1,957.10	1,041.30	2,076.00	675.1

GRI	Data	Unit	2020	2021	2022	2023 ^{(1),(2),(3)}
	Percentage of recyclable plastic packaging	% of the total weight of all plastic packaging	33.00	58.77	46.55	65.87
	Percentage of compostable plastic packaging	% of the total weight of all plastic packaging	0	0	0	0
	Percentage of recycled content within your plastic packaging	% of the total weight of all plastic packaging	0	3.52	1.29	3.46
	Data Coverage	% of cost of goods sold	94.00	90.00	90.00	90.00

Remark:

- N/A = Not available (the data is not ready to disclose in the reporting year)
- No data = No data
- Not Applicable = those indicators are not relevance to the company's business.
- ⁽¹⁾ Scope of Data:
 - 1. Data covers the following operations:
 - Factories in Thailand, Indonesia, Vietnam, France, Portugal, Poland, Germany, Norway, Ghana, Seychelles, Lithuania, Russia Federal, and the United States of America.
 - Offices and Farms in Thailand
 - 2. The environmental data excludes the following operations:
 - Retail operations
 - Offices located outside Thailand
 - The data reporting is in progress and expected to report in the next 2 reporting years.
- ⁽²⁾ The performance data of following farms and hatcheries operations is not included in the performance data 2023 since those operations have been ceased since 2022.
 - Thai Union Hatchery Co.,Ltd. (7 operations)
 - TMK Farm Co.,Ltd. (2 operation)
- ⁽³⁾ In 2023, The following manufacturing operation has been ceased since April 2023 and the performance data were reported until June 2023.
 - Hawesta-Feinkost Hans Westphal GmbH & Co. KG, Germany
- ⁽⁴⁾ The following performance data have been amended from the performance data reported in SD report 2022 for more accuracy:

Reporting year 2020-2021:

- Waste directed to disposal
- Non hazardous waste composting category from onsite to offsite
- Reporting year 2022
- Total finish good volume
- Energy consumption
- Greenhouse gases
- Water withdrawal
- Water discharged
- Water consumption
- Waste generated
- Waste diverted from disposal
- Waste directed to disposal
- Non hazardous waste composting category from onsite to offsite
- ⁽⁵⁾ Biodiesel B10 is no longer used in 2022
- ⁽⁶⁾ The following energy flues have been used in TU's operations since 2023.
 - Biogasoline E20
 - Palm kernel shell
 - Steam purchased from other organization.

- ⁽⁷⁾ The data of GHG emission are calculated based on the amendment of GHG emission calculation methodology in 2021. The following key amendments of GHG emission calculation methodology are:
 - Amendment of emission factors for GHG scope 1 emission aligning with Thailand Greenhouse Gases Management Organization (TGO), GHG Protocol, 2006 Intergovernmental Panel on Climate Change (IPCC) Guidelines for National Greenhouse Gas Inventories, and 2013 IPCC Fifth Assessment Report (AR5).
 - Amendment of emission factors for GHG scope 2 (electricity) by country aligning with GHG Protocol: Green-e Energy Residual Mix Emissions Rates (2018), UNFCCC Harmonized Grid Emission factor data set version 3.0 (December 2021), Institute for Global Environmental Strategies (2022), and TGO.
 - Amendment of GHG emission calculation methodology for wastewater treatment plant, refrigerant, and domestic septic tank regarding to the 2006 IPCC Guidelines for National Greenhouse Gas Inventories Volume 5 Waste.
- ⁽⁸⁾ GHG Emission trends:
 - 1. The GHG emission trend in 2022 decreased from GHG emission in 2021 due to the following improvement:
 - Improve measurement method of methane generated from wastewater treatment plant by using actual meter reading instead of calculation.
 - Change wastewater treatment process in factory in Vietnam.
 - Change unit of natural gas consumption from m³ to kWh, which can result in the emission factor adjustment to align with the accurate natural gas consumption unit.
 - Adjust scope of septic tank calculation.
 - 2. The GHG emission trend in 2023 decreased from GHG emission in 2022 due to the following improvement:
 - Adjust emission factor of electricity from location-based to be market-based emission factor in the operations located in France and Poland.
 - Increase electricity consumption from solar panels.
 - Change energy fuels from non-renewable source to renewable sources in steam generation process (i.e. wood pellet, wood chip, palm kernel shell)
 - Increase energy fuels from fossil fuels to biofuels in stationary combustion and mobile combustion activities.
- ⁽⁹⁾ The initial reporting of significant emissions e.g. NO_x, SO_x and TSP have been placed in the performance year 2023.
- ⁽¹⁰⁾ The third-party water includes desalinated water produced from seawater by private utilities and municipal water produced by the public utilities.
- ⁽¹¹⁾ Other water source is water generated from manufacturing process (e.g. ice packed from freezed raw materials). The Company will monitor the volume of this water withdrawal source and improve in the next reporting year.
- ⁽¹²⁾ The water stress assessment has been conducted by using the AQUEDUCT provided by the Water Resources Institute (WRI).
- ⁽¹³⁾ According to the AQUEDUCT, water stress area has been evaluated based on the country level. The result of water stress area has been classified as High level (40%-80%) and Extremely High level (>80%)
- ⁽¹⁴⁾ Water discharge: The treated wastewater from TU's operations is discharged to the following destinations
 - 1. Surface water
 - 2. Seawater
 - 3. Third party organization for further treatment process
 - Third party organization for further treatment process includes central wastewater treatment process organized by local authority.
- ⁽¹⁵⁾ The information of water discharged to fresh water and other water is not available since no information is available for TDS values of wastewater discharged to the offsite.
- ⁽¹⁶⁾ In 2023, Major equipment upgrade in the wastewater treatment facilities have been started in Ghana and Seychelle to increase efficiency and strengthen compliance that has been acknowledged and approved by local authorities.
- ⁽¹⁷⁾ Waste for site reclamation has been diverted from composting waste and reported in 2022.
- (18) In 2020-2022, "Other Disposal Methods" waste is not classified as any specific waste disposal methods listed in the table.
 (19) Food loss:
 - The food loss data in 2022 have been amended from the performance data reported in SD report 2022.
 - Regarding to Thai Union's Commitment on Food Loss & Waste Reduction, the Company has set a target of reducing food loss in ambient, frozen and chilled seafood operations by 50 percent by 2025, compared to a 2021 baseline.
 - Food loss categories from Company's operations include food scraps, by products, and inedible parts of raw materials, such as tuna, salmon, shrimp, and other seafood species.
 - The scope of food loss data does not include the food retail operations.
 - Intensity is calculated from Ton of food loss discarded (A-B), divided by Revenue from ambient, frozen and chilled seafood operations that manufacture products intended for human consumption.
 - As food loss definition does not cover products intended for non-human consumption, revenue from Thai Union Feedmill PCL. (TFM) is excluded from the denominator.
